

INVITATION TO EXHIBITORS

DISEASES OF THE THIRD AGE

An Upcoming Continuing Education Symposium

When: 30th and 31st August 2008

Where: Life Sciences Lecture Theatre
University of Tasmania, Sandy Bay Campus

You are cordially invited to register an interest in taking an option on a Industry Display Table at this forthcoming meeting to be held in the Life Sciences Lecture Theatre and adjoining Seminar Room.

This is the fourth year of organising these Symposia and we have taken the opportunity to continue with a broad scope of topics under the general theme of Aging and Disease. We expect to get registrations in excess of 80 drawn from a target audience of General Practitioners, Registrars, Allied Health Professionals and Medical Students.

We are offering tables in the Seminar Room and foyer at \$500 which includes one full registration for a member of your staff for the two days. (If you are intending for more than one member of your staff to attend then there would be an additional fee of \$30 per person just to cover catering costs.)

Timetable : We anticipate that our Registrants will be free to circulate around your table between 9 – 10am, then at the morning and afternoon half hour breaks, the one hour lunch break and the one hour mixer at the end of Saturday's proceedings.

Website : www.medlabstats.com/oldage.htm
